June 09, 2011

Dear Shareholder of New World Generation Inc.,

This brief notice is to inform you of some personnel changes within our organization.

We are pleased to announce that Mr. Larry Cundy has been appointed to the position of Chair of CWind International. Mr. Cundy has 40 years of professional experience in the engineering and construction industry. His background as a business executive involves direct contributions to strategic business growth and bottom-line improvements in productivity, sales, revenues, margins, and profits. He has a diverse industry expertise including power generation, transmission/distribution, pulp and paper, metals, gas transmission, transportation, automotive, petroleum, chemical, health and life sciences, and government.

Please also be advised that Mr. Douglas Andrews is no longer working with CWind. We wish Doug well in his future endeavors.

The goal of our corporation has remained steadfast. We will continue to make every effort to capitalize on current business contacts with efforts focused on bringing value to the organization and to shareholders.

It has been a difficult economic climate to compete in, with most of our challenges surrounding the ability to prove the performance and reliability of the product compared with others currently in the market.

The boards of New World Generation and CWind recognize that it has been sometime since our last Annual General Meeting AGM, however, our resources must be spent on the current strategic path. We will be certain to bring forth any information of concern or merit to the shareholders by way of an AGM or special meeting.

Sincerely,

Peter Routliff – Chair
