

NEW WORLD GENERATION INC.

November 4, 2013

Dear Shareholder,

Over the past three months, NWG has worked diligently to secure a bridge loan through private investor(s). This has been done to accomplish three things:

1. Continue operating the business
2. Maintain the company's patents
3. Invest in NWG's future

NWG has a plan in place to enter the market with a commercial product in the energy storage market.

This will be achieved by a strategic joint venture agreement with a third party, which has yet to be completed and at request of the third party is completely confidential at this time. NWG is currently working with legal counsel on this aspect.

The first engineering milestone will be completed by December 31, 2013. The second phase will be modeling and testing the engineering work. The first sale of the unit has been secured depending on the outcome of the second phase. These timelines are aggressive and are keeping our team busy, as we do have a date of delivery for the first unit.

We as a Board are very excited about this opportunity.

Collectively, this past year, the board of NWG has provided approximately \$100,000.00 in short term loans to the company, in order to maintain the business. We hope this provides you with evidence that we have confidence in this business.

NWG would like to notify you that our web site will be upgraded within the next 30-60 days, and our contact number has changed to 226-974-1339.

Another newsletter will be issued in December, to keep you updated of our progress.

Sincerely,

The NWG Board of Directors
