

NEW WORLD GENERATION INC.

February 28, 2015

Dear Shareholder,

The month of February has gone by quickly, but again, progress has been made.

NWG is appreciative to our new patent attorneys at Norton Rose, for making an introduction to a large investment firm in Toronto. They have shown initial interest in the Energy Storage System being developed by NWG and will be opening a new fund in the next 3-6 months. Discussions are ongoing.

Work has officially commenced with SNC Lavalin, which will initially be a quick analytical review and then detailed system cost analysis. Their experience and excitement in the project is noteworthy.

While the above update is brief in nature, we are busy, and look forward to a more fulsome update by the end of March.

With best regards,

President and Chairman of the Board
